

Issues I have tried to get on the ASC agenda this year

- Evaluate the effectiveness of using time slot weights
- Review and simplify patterns
- Examine designated rooms for particular patterns
- Annual schedule
- SIS transfer
- Vulnerable courses
- Scattering meeting times
- Start classes at 8:30 instead of 8:00
- Possibility of DCU data entry being moved out of departments, accompanied by development of simpler functional requirement forms
- Tiered exceptions

Other possible issues:

- No back-to-back constraint
- Effect of research days on schedules
